

Project Receipt || Healthy Life

Project Name: Healthy Life (E-Commerce Web Application)

Technology Stack: MERN (MongoDB, Express.js, React.js, Node.js)

Client: Nazmul Huda Rahat (01841894843)

Prepared By: Abdullah Al Akash (01859096600)

Date: 28th May 2026

🚀 Project Scope & Deliverables

🛒 Frontend (Customer Interface)

1. Homepage & Navbar

A professionally designed homepage following a modern e-commerce layout similar to shop.shajgoj.com, including a responsive navigation bar for smooth browsing across all devices.

2. Footer Section

An attractive and informative footer including essential links, contact details, and branding elements to enhance user trust and experience.

3. Product Card System (Main Product for Everyone)

Clean and user-friendly product cards displaying key information such as product image, name, price, and quick actions for better product visibility.

4. Product Details Page

Detailed product view including full description, images, pricing, and a dynamically generated related products section based on category to improve cross-selling.

5. Checkout Drawer

A smooth and fast checkout experience using a drawer-style interface, allowing users to place orders without leaving the current page.

6. Order Tracking System (Bonus)

A customer-facing tracking feature enabling users to check the status of their orders in real-time after placing an order.

⚙️ Admin Dashboard (Management Panel)

1. Dashboard Overview

A central dashboard providing a quick summary of overall business performance and key activities.

2. Reports & Analytics

Comprehensive reporting system including total sales data, top customers, and top-selling products for business insights and decision-making.

3. Order Management

Full order handling system including order updates and integration with Steadfast courier for product shipment processing.

4. Dynamic Landing Page

A fully customizable landing page management system that allows the admin to dynamically update banners, promotional sections, featured products, offers, and marketing content in real-time without requiring any code changes, ensuring flexible campaign management and improved customer engagement.

5. IP Block System

Security feature to block suspicious or fake order attempts based on IP tracking.

5. Auto IP Block

Security feature to block suspicious or fake order attempts based on IP tracking after provide single order for 30minutes auto block.

🔧 Additional Services

Facebook Pixel Integration

Setup and configuration of Facebook Pixel Integration.

Steadfast Courier API Integration

Seamless integration with Steadfast courier service to automate shipment creation, order processing, and delivery tracking. Orders can be directly sent to the courier system from the admin.

Full-Stack Web Developer

Client Receipt Terms & Conditions – Website Development

1. One (1) month of free support is included from the date of project delivery, covering up to three (3) minor revisions.
2. After the free support period, all maintenance and support services will be provided on a subscription basis or charged separately as agreed.
3. Advance payments are strictly non-refundable under any circumstances.
4. Additional features or enhancements may be included based on the agreed project scope and budget.
5. Lifetime website warranty is provided based on the technology used; however, this does not include third-party service failures or external issues.
6. All required content (text, images, media) must be provided by the client before development begins. Delays in content submission may affect delivery timelines.
7. Any third-party costs (domain, hosting, plugins, APIs, etc.) are the sole responsibility of the client.
8. Project delivery timelines may vary if the client delays providing required information, feedback, or approvals.
9. The website design and source code remain the property of the developer until full payment is completed.
10. Any major design or functionality changes after approval may incur additional charges.
11. The developer is not responsible for downtime or technical issues caused by third-party hosting providers or services.
12. After project delivery, the client is responsible for maintaining regular backups of all website content and data.
13. Final project handover will only be completed after full payment is received as per agreed milestones.
14. The developer reserves the right to showcase the project in portfolios, case studies, and promotional materials.
15. Website usage training (if included) will be provided within the free support period only.
16. Compliance with legal and regulatory requirements (e.g., privacy policy, GDPR, local laws) is the client's responsibility.
17. Custom integrations with third-party services (e.g., payment gateways, APIs) may require additional charges.
18. The developer is not responsible for SEO ranking, marketing performance, or social media results unless explicitly agreed in writing.
19. All support requests must be submitted via email or an agreed project management system for proper tracking and response.
20. Emergency or urgent support requests outside normal working hours may incur additional charges.
21. Any revision requests beyond the included free revisions will be billed separately.
22. The developer is not responsible for issues or downtime caused by client-side modifications or unauthorized changes.

23. The developer is not liable for any loss, damage, or data breach caused by misuse, negligence, or failure to follow security best practices by the client.
 24. The website will be tested on standard devices and modern browsers; compatibility with uncommon devices or outdated systems is not guaranteed.
 25. All payments must be made in the agreed currency and method. Late payments may result in project delays or temporary service suspension.
-

Acceptance:

By proceeding with the project, the client agrees to the above terms and conditions.
